

From our facilities in Chicago, IL, BBI is pleased to service customers across North America including Canada, Mexico and Latin America.

Since 1950 ... it's all we do. Manufacturing first quality batteries for industrial applications. Our state-of-the-art facilities produce batteries able to meet the rigorous operating demands of today's material handling equipment. With our partners, we deliver the very best in DC Power to include charging facilities and complete handling equipment.

5 Plate Wrapping Process

Best Quality Finish Materials

Industry's Best Construction

5-7 years performance Rated

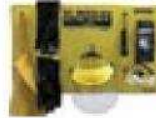

- Precision grid casting using highest grade alloys for maximum life
- Industry's largest post and brinidge design for ultimate durability
- Computerized pasting process insures best grid densities providing maximum performance
- Thermo-welded jar-cover seal eliminating battery top electrical shorts and corrosion.
- Best quality cables connectors and protective hardware
- Fully epoxy coated acid-resistant steel trays
- Industry leading thick grid design provides 100% performance with power to spare
- 1500-2100 cycle performance
